Main features

MegaBill

Unparalleled observability from day one
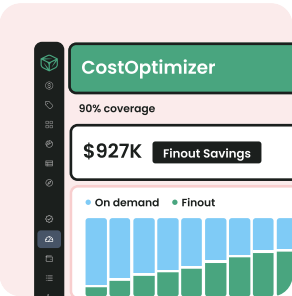

Finout is built from the ground-up to support cost view of multiple cloud providers and services in one dashboard at any granularity.

Total $518K
- AWS $212K
- GCP $137K
- Datadog $91K
- Azure $78K

MegaBill

## Insatnt tagging

100% accurate cost allocation

Finout's virtual tagging solution gives you the ability to tag every service in the MegaBill instantly and allocate it per team, environment, app or anything else for that matter.

Virtual Tags

Set Tag rules
Where — AWS
And — Kubernetes
And — Azure
Will create — Production

## Cost optimization suite

Cut up to 45% of your spend

Use Finout's CostGuard to detect waste and get recommendations from day one and leverage CostOptimizer to automaticity buy and sell Reserve Instances.

CostOptimizer
