> Cloud FinOps Engineer, **ManoMano**

Main features

✓ **MegaBill**

## Unparalleled observability from day one

Finout is built from the ground-up to support cost view of multiple cloud providers and services in one dashboard at any granularity.

✓ **Insatnt tagging**
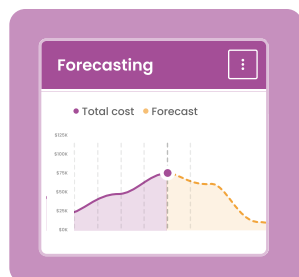

100% accurate cost allocation

Finout's virtual tagging solution gives you the ability to tag every service in the MegaBill instantly and allocate it per team, environment, app or anything else for that matter.

✓ **Cost optimization suite**

Cut up to 45% of your spend

Use Finout's CostGuard to detect waste and get recommendations from day one and leverage CostOptimizer to automaticity buy and sell Reserve Instances.

✓ **Cost governance suite**

Cloud agnostic protection

Anomaly Detection, Budgeting, Forecasting, email or Slack alerts for not only cloud providers but also for your data warehouses, CDNs and observability tools.

✓ **Unit economics**

Advanced business context capabilities

Go beyond your service costs and enhance your profitability by scrutinizing your cost per customer, event, segment, feature, and more.
